Sample Handout (PDF attachment demo)

This file is only a placeholder.
Replace it with your own handout PDF:

    content/text/sample-handout.pdf

Or point data/chapters.js to another file:

```
docs: [ { path: "content/text/your-file.pdf",
          title: "..." } ]
```

The viewer embeds it with <iframe> and also offers a "open in new tab" link, which is more reliable on mobile browsers.
